

Declaration of Conflict-Free Minerals

Dear Valued customer,

Conflict minerals originating from the Democratic Republic of the Congo (DRC) are sometimes mined and sold by armed groups to "finance conflict characterized by extreme levels of violence".

Some of these minerals and the metals created from them (such as tantalum, tin, tungsten, and gold) can make their way into the supply chains of the products used around the world, including those in the electronics industry.

Autotalks has a comprehensive social responsibility policy that includes the use of only conflict-free tantalum, tin, tungsten, and gold in our products.

We expect and monitor our suppliers to have in place policies and due diligence measures that will enable us to assure that products and components supplied to us contains only minerals that are DRC conflict-free.

Sincerely,

Alberto Burger
VP Operations, Quality and Reliability
